Professional summary

Multidisciplinary founder and business operator combining business architecture, property development and practical AI systems building.

Organizes complex information, connects specialist perspectives and translates ideas into operating structures and coordinated projects.

Professionally shaped by Israel's innovative startup environment.

Core capabilities

Business architecture / Project coordination / Process design

Knowledge organization / AI systems architecture / Real estate development

Professional experience

Realization | Founder and Owner

2019 - Present | Portugal

- Lead business architecture consulting and Portuguese property development and investment activity.
- Coordinate investors and partners across architecture, legal, financial and technology work.
- Build AI workflows to organize business information and support research, planning and execution.

Selected projects

Arena residential development

GP manager and shareholder in the company developing an **11-unit residential building** in Barreiro, Portugal. Ongoing development.

RealizeOS AI operations system

Built for internal operations; later extended to users and Realization clients. Connects business context with AI architecture and agentic workflows.

realization.pt property platform

Founder, product visionary and platform builder. Shapes the concept with a development lead responsible for software delivery.

Under development and internal review.
